

# PRODUCT RELEASE ANNOUNCEMENT

KENNEDY TECHNOLOGY GROUP

RELEASE DATE: 1/03/04

Market: General Aviation

Product: *CellSet*

Model: GA5000-2M

MSRP: USD 289.95

Availability: Immediate

Photo and assembly drawing available at : [www.cellset.com](http://www.cellset.com)

Compatibility: High impedance, stereo or monophonic general aviation style panels and headsets.

Power Requirements: Standard 9Vdc battery or ship's power.

Operation: *CellSet* plugs inline between the user's headset and his panel position. There are plugs and cord sets to connect the unit to the user's cellular telephone, auxiliary audio/music source (e.g. MP3 player) and plane's cigarette lighter receptacle

In the absence of cell phone or auxiliary audio, *CellSet* sleeps. In this state, it pulls only micro-amperes of current and can remain in this state for over 10,000 hours if running on it's internal battery. Once audio is detected from either the cellphone or auxiliary audio source, *CellSet* wakes up to amplify those sources and present them to the user's headphones. Once those audio sources become silent, *CellSet* goes back to sleep.

*CellSet* prioritizes audio: If the user is listening to music, any incoming cell phone or panel audio will cause *CellSet* to mute the auxiliary audio and give priority to those sources. Panel audio will not mute cell phone audio nor will cell phone audio mute panel audio.

Safety Feature: In the case of a panel failure, *CellSet* will bias the user's headset microphone and allow him to make and receive phone calls.

Available Configurations:

- ◇ Univ. - For phones with a universal, 2.5 mm diameter, **three** conductor headset jack. This includes all Motorola, most Sanyo, Samsung, and Kyocera. Many Ericsson and Nokia phones do not have this connector, but may use an adapter to connect to this *CellSet*.
- ◇ NOK4 - For Nokia Phones that list headset item HDC-5P (2.5 mm, **four** conductor connector) as an accessory. Not compatible with other phones via adapters.
- ◇ SR22 - For Samsung R225 and R229 phones ( 2.5 mm, **four** conductor with outer ring). Not compatible with other phones via adapters.
