*Thank you for purchasing our product!*

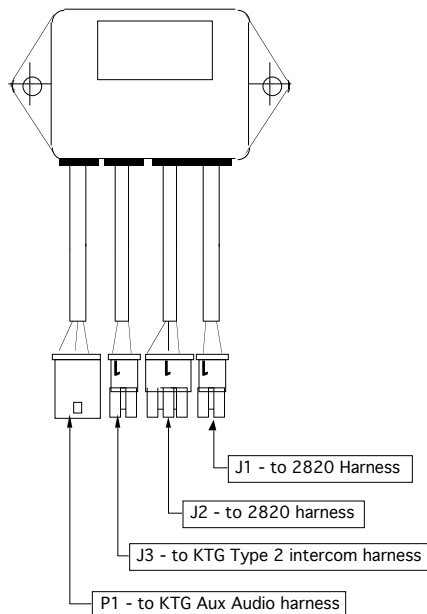

We hope that your new *CellSet* gives you many hours of clear and comfortable operation.

This product was designed to connect to a Garmin 2820 and a variety of intercoms and bike auxiliary audio input types. It must be used in conjunction with a KTG Type 2 Intercom Harness, a KTG 2820 Stereo/mic/power Harness, and a KTG Aux Audio Harness (each sold and packaged separately).

Connect *CellSet* jack **J1 and J2** to the 2820 Stereo/mic/power Harness you purchased.

Next connect *CellSet's* jack **J3** to the Intercom Harness you purchased.

Finally, connect *CellSet's* plug **P1** to the Aux Audio Harness you purchased.

Refer to the instructions sheets provided with the Intercom, Aux Audio, and 2820 Stereo/mic/power Harness. Complete those installations.

Mount the box to the bike using tie wraps.

**Turn on your intercom and Aux Audio system** and adjust both to their usual settings. Put on your helmet/helmet.

To talk on the phone after you take or make a call, simply speak into your headset's microphone.
