

# PRODUCT RELEASE ANNOUNCEMENT

KENNEDY TECHNOLOGY GROUP

RELEASE DATE: 12/12/06 - Part #65310R0

Market: Touring Motorcycle

## Products:

Zumo Harness, Stereo/Mic/Power.

Part number: 95423.

Cost: USD95.00

Zumo Harness, Stereo to mono converter

Part Number: 95424

Cost: USD15.00

This harness and the devices listed below allow motorcyclists to fully exploit the capabilities of the Garmin Zumo which includes GPS spoken alerts, MP3 and XM satellite radio, and bluetooth cell phone audio.

This harness will most usually be used with the following *CellSet* interface assemblies:

| Part# | Model                   | Description  |
|-------|-------------------------|--|
| 95415 | CellSet, MC/GPS-AUX/MIC | Zumo audio output is connected to the bike's auxiliary audio system. Rider and passenger cell phone audio is acquired from bike's intercom system. |
| 95413 | CellSet, MC/GPS-ICS/MIC | Zumo audio output is connected to the bike's intercom system. Rider and passenger cell phone audio is acquired from bike's intercom system.        |

If the customer requires the Zumo output be treated as an alert audio source rather than a stereo audio source (e.g. customer wants only GPS alerts and is connecting an XM receiver and MP3 player for his music sources), adapter part number 95424R0 must be used to convert the Zumo harness's 3 circuit microfit connector (used on stereo harnesses) to the Kennedy standard, 2 circuit (alert device) microfit connector. This adapter will allow him to connect the Zumo output to the alert input of a Kennedy interface assembly module such as a SingleSet, DualSet, SingleAuxADSet, or DualAuxAdSet.

These and other previously released Kennedy assemblies and harnesses can be used to provide a solution for nearly every bike type, audio system, and rider preference.

To select the appropriate components, review the Configuration Guide, assembly drawings, and user guides at : [www.cellset.com/2820orzumo.html](http://www.cellset.com/2820orzumo.html)
