

PRODUCT RELEASE ANNOUNCEMENT

KENNEDY TECHNOLOGY GROUP

RELEASE DATE: 06/26/07 - Part #65340R0

Market: Touring Motorcycle

Product: *CellSet, MC/GPS3*

Part number: 95441

MSRP: USD105.00

Replaces: *CellSet, MC/GPS2*

Description: This device allows the user to connect multifunction GPS devices such as the Garmin 2820 and Zumo to a variety of bike audio systems. It allows the user to switch the GPS's audio between the bike's intercom and auxiliary audio input.

This switching features allows users to enjoy the GPS stereo music, hear alerts and cell phone audio through the auxiliary audio system. If the user then wants to listen to the bike's AM/FM radio, this new model allows him to switch the GPS audio to the intercom. Any GPS alerts or cell phone audio will then be present in the intercom system.

This unit uses all the same harnesses and switch assemblies that the *CellSet, MC/GPS2* uses. It functions identically to the *MC/GPS2* except that the user can set the mic audio levels for different intercom levels. This is required when intercom levels are set differently when the unit is switched between the auxiliary and intercom mode.

To select the appropriate components, review the Configuration Guide, assembly drawings, and user guides at : www.cellset.com/MultiGPS.html
